

## LACCD ENGLISH, ESL, and MATH Placement

California Education Code 78213 (formerly Assembly Bill or AB 705) took effect January 1, 2018 and requires California Community Colleges to use multiple methods of placing students into transfer-level English, English as a second language (ESL) and math and statistics courses. These methods must include the use of high school cumulative grade point average (HSGPA) and possibly high school courses taken and grades earned. The law also requires that the method that yields the highest placement overrides all other methods. For more information, visit: <https://assessment.cccco.edu/>.

In response to this law, the California Community Colleges Chancellor's Office established "default" (standardized) HSGPA ranges for colleges to use as the basis for placing students into such courses. Colleges may depart from these standardized HSGPA ranges, but they must provide statistical evidence that such departures meet or exceed the standardized targets set by the California Chancellor's Office, and that students placed into any pre- or corequisite for a transfer-level course are highly unlikely to pass the transfer-level course without it.

When you apply to the Los Angeles Community College District (LACCD) using CCCApply or update your placement information using the MMAP Web Form on your To-Do Checklist, the information you provide will be evaluated based on the placement criteria in order to assign a placement code: "E" for English/ESL, and "M" for math/statistics. Your assigned code, a description of what it represents and a list of any courses cleared for enrollment will appear on the Assessment tile in your Student Portal.

### Guided Self-Placement

If you are not able to provide enough information for automated placement, or you have been away from high school for more than 10 years, or you did not attend or graduate from a US high school or earn a GED or CA High School Proficiency certificate, you may use the Guided Self-placement process. This may involve meeting with a college representative to discuss relevant guidance, including your rights under the law.

### Continuing Students

If you were placed prior to summer 2019, you may use the MMAP Web Form shown on your online portal To-Do Checklist to update your placement information. If you completed a placement for enrollment prior to summer 2019, you are not required to adhere to its results. This is especially true if you were placed below transfer-level in English or more than one level below-transfer in math or statistics. Instead, you may enroll in any course listed in your new placement message without taking any course below it in the sequence, even if that means skipping several courses that would have been required under the old placement.

### How Placement Affects Pre-/Corequisites, Major Requirements, and Math Competency

When you place into a course that is part of a sequence, you do not need to take any course lower in that sequence, whether such a course is a pre- or corequisite to any course in the same or any other subject, or a prerequisite or requirement for any program.

Here's one of many possible examples: At some colleges, MATH 115 is listed as a prerequisite for courses like CHEM 065, ECON 001, and MATH 125 and possibly as a major requirement for some certificates. All students who complete placement will place higher in the sequence than MATH 115. Therefore, no student is required to take MATH 115 for any reason—they will have satisfied the MATH 115 pre- or corequisite for all courses that require it, and they will have satisfied the MATH 115 requirement for any award programs that list it. Likewise, in a broader example: Students who place into any transfer-level math course are not required to take any below-transfer-level math course for any reason.

While many majors do not require any math, if you intend to earn an associate of arts/science degree and have not met math competency you will need to do so prior to graduation. If you maintain catalog rights from prior to fall 2019 and have placed into any transfer-level math course, you have met math competency for all AA/AS degrees. If you were admitted in fall 2019 or later, you may meet competency by verifying earning a grade of C- or higher in Algebra 2 or equivalent or higher at a US regionally accredited high school or college, or through other means. See a counselor for details.

The following pages describe the placement codes, criteria for placement, and courses/services aligned with each code.

## ENGLISH/ESL PLACEMENT CODES

Criteria*	No ESL placement	ESL placement 1-below transfer	ESL placement 2-below transfer	ESL placement 3-below transfer	ESL placement 4-below transfer	ESL placement 5-below transfer
2.6≤HSGPA	<b>E1</b>	<b>E4</b>	<b>E8</b>	<b>E12</b>	<b>E15</b>	<b>E18</b>
1.9≤HSGPA<2.6	<b>E2</b>	<b>E5</b>	<b>E9</b>	<b>E13</b>	<b>E16</b>	<b>E19</b>
0.0<HSGPA<1.9	<b>E3</b>	<b>E6</b>	<b>E10</b>	<b>E14</b>	<b>E17</b>	<b>E20</b>
HSGPA=0.0 or is null	<b>EN</b>	<b>E7</b>	<b>E11</b>	<b>E15</b>	<b>E19</b>	<b>E23</b>

\*HSGPA is the high school grade point average for students who are attending or have graduated from a US regionally accredited high school or possess a GED or CA High School Proficiency certificate, any within the last ten years. It may be reported via CCCApply or from the CCCTech Center (from verified high school transcripts), or by continuing students who complete the MMAP Webform. Upon completion of the CCCApply application, students will be automatically assigned the placement code in green that corresponds to their HSGPA value. This enables them to enroll in any courses associated with that code. Students who opt to complete ESL placement will have their placement code updated to one that intersects their HSGPA value and their ESL placement result. Courses associated with their initial placement will remain open, but will be appended by those associated with the ESL placement result. If you wish to complete the ESL placement tool, please contact your counselor or ESL faculty member.

### MATH/STATISTICS PLACEMENT CODES\*

\*HSGPA is the high school grade point average for students who are attending or have graduated from a US regionally accredited high school or possess a GED or CA High School Proficiency certificate, any within the last ten years. It may be reported via CCCApply or from the CCTech Center (from verified high school transcripts), or by continuing students who complete the MMAP Webform. HS High Math is the higher of the two CCCApply values for "highest high school math course taken" and "highest high school math course passed." Criteria for BSTEM (courses for Business, Science, Technology, Engineering, and Mathematics majors) uses both metrics to define three or more placement tiers, depending on the college. Criteria for SLAM (Statistics and Liberal Arts Math courses) uses HSGPA to define three placement tiers. The type in blue, dark red, and green indicates differences in placement criteria between colleges. Light red type indicates deviations from the state default placement criteria. The intersection of both sets of tiers results in the placement codes (and combined criteria) shown. Upon completion of the CCCApply application, students will be automatically assigned one of these codes. This enables them to enroll in any courses associated with that code.

DEFAULT		SLAM
